Objective

Seeking an opportunity for Data Analyst Role in an organization where I can contribute for the mission of the organization and excel in my career.

Work Experience

Company : Zidio Development **Sep 2025 – Oct 2025**

Project Title : Time Series Analysis and Forecasting for Stock Market

Scope : To analyse and forecast stock market trends using time series analysis techniques, exploring various time series models to understand historical patterns, identify trends and seasonality, and make short-term or long-term predictions.

I did my internship and training for data science and analytics. With the historical data of Apple Inc from Yahoo Finance of the duration from January 2025 to September 2 2025, I performed exploratory data analysis, ARIMA (Autoregressive Integrated Moving Average) forecasting, SARIMA (Seasonal Autoregressive Integrated Moving Average) forecasting, Prophet forecasting, and LSTM (Long-Short Term Memory) forecasting, Model Evaluation using Linear Regression, Visualizations, Insights, using Python and using Tableau, I created a dashboard with four visualization worksheets and deployed the project using either flask, FAST API, Streamlit, or Django.

Company : HCLTech **Oct 2025 – May 2026**

Project Title : Process Associate

Scope : To communicate with the solicitors, so called mediator between an advisor, and the customer of Bank of Ireland Mortgages.

I worked at HCLTech Ambathur-6 in relation to process associate that includes:

- Handling Bank of Ireland Mortgage customer's solicitor calls to check the updates of each document for release of funds.
- Entering application numbers that are either 7 or 8 digits to check the status of the application in Mortgage Desktop App, where the documents are either outstanding, or under review, or accepted by the respective team.
- Verifying the solicitors through a couple of questions, if one is answered wrongly, an additional question is asked.
- Recording all inbound call conversations in a website called ROME under phone team notes.

Education

Master of Science in Applied Data Science **June 2023 - May 2025**

SRM Institute of Science and Technology, Chennai

CGPA: 8.22

Bachelor of Science in Statistics **Aug 2020 - May 2023**

Loyola College of Arts and Science, Chennai

CGPA: 6.27

Project Undertaken during UG and PG

Company : OPPO Mobile Company

Project Title : Automobile Sales Ratio Analysis (UG)

Scope : To analyse the sales of different make, model and types of cars in India.

Description : With the yearly sales data collected based on make, model and categories of cars in India, I did an analysis and generated the visual output using Pie chart, Scatter plot, etc with the use of Excel and SPSS.

Company : Nilofer 3D SaaS (Remote)

Project Title : Meals Prediction for Airlines Passengers (PG)

Scope : To optimize the quantity of food preparation and reduce food wastage.

Description : I primarily created a sample chatbot using HTML + JavaScript + CSS for frontend, used GitHub to create repository for inserting the frontend files, and logged in with the GitHub Repository Created on Netlify to launch the chatbot. Using HTML + CSS + JavaScript, and Python, I created webpage named Airlines Food Preference System to train two datasets, one with passenger's name and food choice, and the other with food menu and food quantities to generate another webpage named food preference list. Finally, I got certification for my mini-project with the title "Creating AI Web Product for Meals Prediction for Air Passengers".

Company : Nilofer 3D SaaS (Remote)

Project Title : Single Click Multiple Social Media Posting with Customized Copywriting Each (PG)

Scope : To post images in multiple social medias using a single click and autogenerate copywrite content for the post.

Description : I primarily created a website named Somepo using HTML, JavaScript, to prepare the frontend, used the Credentials of Google Cloud Console for google authentication process, GitHub for creating the repository, and Netlify to use the GitHub repository to get logged in for launching the website. Using Python, HTML, JavaScript, and JSON, I created an AI Copywriting Agent for LinkedIn and Tumblr to auto-generation of content based on the elements in the post of a picture or a photo. Finally, I got certification for this project with the title "Creating an AI Copywriting Agent for LinkedIn and Tumblr".

Skills

Programming Language : Python, C++ (Basic), SPSS (Basic), SQL

Web Development Tools : HTML, JavaScript, CSS

Online Design & Dev Tools : Canva, Figma, GitHub, Netlify, Hugging Face, Weka

Tools Use Cases : I used **Canva** for Video editing, making resume, and cover image for LinkedIn profile, **Figma** for making Portfolio frontend design, **GitHub** for creating Repository to store files like python, html, etc., **Netlify** for hosting a website with the GitHub repository, **Hugging Face** for integrating ML models for the backend code, and **Weka** for performing classification and regression processes.

Online Course Certifications:

1. Generative AI for Beginners (Simpli-learn)
2. AI ML Projects (Simpli-learn)
3. Data Science for Business | 6 Real-world Case Studies (Udemy)
4. SQL - MySQL for Data Analytics and Business Intelligence (Udemy)

Other Activities & Interests:

Outreach : Participated in the college outreach regarding survey about people's needs

Music : Keyboard Completed Theory up to Grade-5, Vocal and Practical up to Grade-1

Video Editing : Created more mashup videos to post them on my YouTube Channel named I'M WAITING EDITZ
